

ABES Institute of Technology, Ghaziabad

A CRC Training Program - Odd Sem (Session - 2026-27)

Training Name - JavaScript

BCA 3rd Sem (2025 - 2028 Batch)

Prerequisite : HTML, CSS, BootStrap		
Table of Contents	Detailed Contents	Hrs.
Introduction to JavaScript	- Client-Side Scripting and Server-Side Scripting - What is JavaScript? - JavaScript Program to Print Hello World - How to include a JavaScript file in another JavaScript file?	2
Variables and Datatypes	var, let, const, Data Types, Type Conversion, Null and Undefined	2
Operator	- Arithmetic Operators - Difference Between == and === in Javascript - Logical operators in JavaScript - Comparison Operators in JavaScript	2
Conditional Flow in JavaScript	- if, else, and else if Statement - Switch Case - WAP to find whether a number is even or odd - WAP to find largest number among three numbers - Write a Java program that reads a floating-point number and prints ""zero"" if the number is zero. Otherwise, print ""positive"" or ""negative"". - WAP to print day name of a week (day number starting sunday as day 1).	2
	- Loops in JavaScript (for, while, break, continue) - WAP to print a table of given number n onto console. - WAP to print sum and multiplication of digit of given number. - WAP to reverse the digit of a given integer	2
Function	- Function Defination, Function Parameters, Function Call - Function Expressions, Self-Invoking Functions - JS - Math (Random , floor , sqrt , round , ceil , trunc , pow)	2
PROJECT 1	Project based on Javascript and js-math like- OTP Generator, Rock Paper Scissor, Dice, Calculator	
String	String, String Methods - WAP to get the character at the given index within the String - WAP to find substring starting from given index upto given index - WAP to count a number of vowels in a given string. - WAP to find total number of alphabets, digits or special character in a string. - WAP to concatenate a given string to the end of another string.	2
Array	Array, Array Methods, Array Search, Array Sort Array iteration	2
PROJECT 2	Project based on Javascript and use concept of array and string	
Objects	Creating a JavaScript Object - Using Object Literal Syntax - Using Object Constructor, Using the Object.create Method - access object using notation and [] notation - Nested Objects - access nested objects using the dot notation - JavaScript Object Methods - Loop over Object, Destructuring object	2
DOM and Events	Introduction, Finding HTML Elements, Changing HTML Elements, Adding and Deleting Elements	2
	Introduction to Events, Mouse Events and its methods, Window Events	
Total		20
